Safi, Marrakesh-Safi Region, Morocco | 22 Years

PROFILE

Second-year engineering student (ENSIASD, IT Management & Governance track) combining full-stack development, freelance/agency work, and IT governance. Hands-on experience designing secure platforms (CIH Bank, high-security international clients), end-to-end project delivery, and working knowledge of governance frameworks (COBIT, ITIL, ISO 27001/27002, CMMI).

EXPERIENCE

CIH Bank — *July – September 2026*
Full-Stack Developer Intern — Casablanca, *Morocco*

- Independently designed and built a secure third-party risk-management platform (SITEX), bilingual (French/English) — replacing a manual compliance process with a centralized, auditable system (React, Spring Boot, SQL Server).
- Managed identity and access via Keycloak (OAuth2/OIDC, RBAC); implemented an immutable audit trail and a nightly batch process for proactive suspicious-activity detection.
- Owned the project end-to-end (architecture, development, testing, documentation), using GitLab for version control.

Agency4You (Fiverr) — *October 2024 – Present*
Freelance Full-Stack & Blockchain Developer — *Remote, Morocco*

- End-to-end management of 20+ international client projects (quoting, design, development, deployment, contracted maintenance), including several high-security platforms (Next.js, PostgreSQL, Prisma, Docker, VPS).
- Delivered around twenty websites for local businesses and independent brands, with long-term maintenance contracts for several clients.

Yanecode Digital — *July & October 2025*
Software Development Intern — *Remote, Morocco*

- Built « Tutor Connect » (Next.js, TypeScript, Firebase, REST API), including automated Google Meet link generation and automated tests for key features.

Office Chérifien des Phosphates (OCP) — *June 2023 – June 2024 (2 internships)*
IT Intern — repeat internships — *Safi, Morocco*

- (2024) Built a maintenance mobile app (Flutter, Firebase) centralizing real-time equipment and stock data access for multiple teams.
- (2023) Built a Python-based platform synchronizing industrial systems (PI, OPM); resolved a critical issue affecting production continuity.

EDUCATION

École Nationale Supérieure de l'Intelligence Artificielle et Sciences des Données — *September 2024 – July 2027 (ongoing)*
State Engineering Degree, specialization in IT Management & Governance — *Taroudant, Morocco*

École Supérieure de Technologie – EST Safi — *September 2022 – July 2024*
University Diploma of Technology (DUT), Computer Engineering — *Safi, Morocco*

PROJECTS

High-Security Web Platforms — International Clients
Tools: NEXT.JS, POSTGRESQL, PRISMA, DOCKER

- Built several platforms for international clients with high security requirements, integrating third-party APIs for authentication and transaction handling.
- Ongoing maintenance and monitoring for several clients in production.

BRIQUIN — Integrated Management System for a Local Business
Tools: NEXT.JS, REACT, POSTGRESQL, PRISMA, DOCKER

- Gathered requirements directly from the business owner; designed and built an integrated inventory, client and supplier management system, containerized with Docker.

Also: a QR-code attendance platform for ENSIASD Taroudant, a generative-AI email generator hosted on Google Cloud, and around twenty websites delivered to local businesses and independent brands.

SKILLS

- **Full-Stack Development :** Next.js, React, TypeScript/JavaScript, Node.js, Flutter, Spring Boot, HTML/CSS, Tailwind
- **DevOps, Cloud & Security :** Docker, Git/GitLab, VPS (Hostinger), AWS, Google Cloud, IAM (Keycloak, OAuth2/OIDC, RBAC)
- **Databases :** SQL (MySQL, PostgreSQL, SQL Server), PL/SQL, NoSQL (Firebase, MongoDB, SQLite), Prisma
- **Governance & Project Management :** Working knowledge of COBIT, ITIL, ISO/IEC 27001 & 27002, CMMI; full project lifecycle, risk & incident management
- **Networking :** CCNA fundamentals (switching, routing, wireless)

LANGUAGES

Arabic: Native | French: B2 (TCF certified) | English: B2

CERTIFICATIONS

- Generative AI with Large Language Models — *March 2024*
- Generative AI for Everyone — *February 2024*
- CCNA: Switching, Routing, and Wireless Essentials — *February 2024*
- CCNA: Introduction to Networks — *July 2023*
